17 - 25	229	193	229	223	187	223

¹ **ACTUAL WEIGHT** means the weight derived by actual weighing of each passenger just prior to boarding the flight, in the case of infants they shall be weighed along with their accompanying adult. To this weight the allowances for personal clothing and carry-on baggage are required to be added and the resultant value shall be used as the passenger's weight. Where weighing scales are not available or serviceable, or the passenger refuses to be weighed, the passenger's Volunteered Weight or Estimated Weight may be used in lieu of actual weight.

² **VOLUNTEERED WEIGHT** means weight obtained by asking the passenger for their weight, adding 10 lbs to the disclosed weight, then adding the allowances for personal clothing and carry-on baggage and using the resultant value as the passenger's weight.

³ **ESTIMATED WEIGHT** means, where actual weight is not available and volunteered weight is either not provided or is deemed to be understated, the operator may make a reasonable estimate of the passenger's weight, then add the allowances for personal clothing and carry-on baggage and use the resultant value as the passenger's weight.

CARRY ON BAGGAGE means the baggage that a passenger may carry onboard. Based on the particular aircraft stowage limitations, the operator may limit the number, size, shape and weight of the carry-on baggage to enable it to be stowed under the passenger seat or in the storage compartment. Otherwise, the standards allowance is 13 lbs of carry-on-baggage per passenger, and remains constant throughout the year. Carry-on baggage weight shall be included in the weight of the passenger for the purpose of weight and balance calculation. Carry-on baggage weight need not be added to the weight of each passenger when no carry-on baggage is permitted on the flight.

PERSONAL CLOTHING OR CLOTHING ALLOWANCE means a weight allowance for personal clothing that a passenger may carry on board the aircraft. It is standardized as 8 lbs for summer and 14 lbs for winter, and must be added to the passenger's weight for the purpose of weight and balance calculation.

NOTE: Segmented weights include personal clothing and carry-on baggage allowances.
